UltraZap SpillGuard The Smart Way to Protect Your Facility Against Slip and Fall Incidents

According to the Bureau of Labor Statistics, slip and fall accidents are the number one cause of accidents in hotels, restaurants, and public buildings. The National Safety Council estimates that the average restaurant has anywhere between three to nine slip and fall accidents each year.

Dangerous spills can occur anytime, anywhere in your facility. The speed and efficiency of the clean-up is critical to ensuring a safe, accident-free environment.

Helps Prevent Accidents and Reduce Liability Exposure

Paper Pak Industries, a leader in the absorbency market, has developed two smart and simple ways to improve guest and employee safety. UltraZapSpillGuard pads are a fast and safe way to initialize the clean up process and mark an area as a hazard to surrounding patrons and employees while minimizing liability damages for negligence.

UltraZap SpillGuard Floor Pad

- Portable pad quickly absorbs spills and creates a safer environment
- Patented cellulose pad is packed with super absorbent polymers (SAP)
- Highly visible Safety Orange backing provides an alert to a hazard
- Reduces and controls liability exposure
- Swift application reduces clean up costs and time
- Less expensive and more effective than paper towels
- 6.75″ x 7″ pad safely absorbs up to 16 oz.* (Product Code UZSG-MD)
- 13.5″ x 12″ pad safely absorbs up to 64 oz.* (Product Code UZSG-LG)
- Inner bag packs can be easily stored in multiple locations for quick access

UltraZap SpillGuard Cooler Sock

- Floor pad absorbs leaks, condensation, and spills under refrigerated and frozen sections
- Prevents against spills leaking into aisles where people could slip
- Patented cellulose pad is packed with super absorbent polymers (SAP)
- Highly visible Safety Orange backing provides an alert to a hazard
- Sleek size and shape is ideal for placement under refrigerated and frozen cases
- 27″ x 4.5″ pad safely absorbs up to 40 oz.* (Product Code UZSG-CS)
- Requires 50% less space than absorbent socks and booms, saving valuable storage and shipping space

* Absorbency specifications based on distilled water
